Child Care Subsidy calculators can be found on Services SA or Centrelink web page: Childcare subsidies are available for families where parents/carers meet the work/study/activity requirements. Usually, family income is between \$68,163 and \$173,163 annually. This changes depending on where on the scale your income sits. This value is an example only and does not consider the 5% withholding from Centrelink if income estimates are incorrect.
